off winter pressure licensing model

WHY CHOOSE MASTERCALL?

In the fast-paced healthcare landscape, efficiency, accessibility, and data security are crucial.

Introducing our Virtual Workspace Service (VWS), designed for NHS organisations to support them during the challenging winter ahead.

ENHANCED ACCESSIBILITY

Access patient records and critical applications securely from anywhere, at any time, fostering seamless collaboration among healthcare professionals.

DATA SECURITY

Protect sensitive patient information with robust security measures. VWS ensures data remains centralised and encrypted.

SCALABILITY & FLEXIBILITY

Adapt quickly to changing demands with scalable infrastructure. Whether adding new users or implementing updated software, VWS provides the flexibility to accommodate NHS organisation growth.

COST-EFFICIENCY

Reduce IT expenses with centralised management and reduced hardware requirements. VWS streamlines maintenance, support & updates, leading to significant cost savings over time.

IMPROVED PATIENT CARE

By eliminating downtime and enhancing accessibility to critical information, VWS empowers healthcare professionals to focus more on patient care and less on administrative tasks or lengthy IT support calls.

INTEGRATION

Our tailored VWS solutions are designed to seamlessly integrate into NHS workflows, ensuring a smooth transition and minimal disruption. We prioritise your unique needs, providing personalised support every step of the way.

Let's elevate healthcare delivery together
